\*former uses around 1900

Interesting, the "evolution" of a building -  
the are "features" in the sheets which I am absolutely convinced  
did not exist in my youth -

"1. Reconstructed West Portico"

I well remember that area was exposed to the rain.  
You ran to the back door (between the "Portico" and main bldg.  
and got in as fast as you could to get out of the rain.

"2. \*Former Surveyor's Office"

Those doors opened into the office where Mrs Socknes,  
my father's long time secretary, worked and where my father  
had a work desk.  
(Being a curious fellow, I would have remembered a surveyor's office.)
