

APPENDIX 5 (Press Release) to Annex L (Release of Information) to Eighth
US Army Nuclear Accident and Incident Control Plan (U)

_____ (date)

(A fire) (an explosion) (several explosions) following a (truck) (railroad)
(Select appropriate phrase) (Select the

(aircraft) (missile site) accident occurred approximately _____ kilometers
(appropriate phrase)

_____ of _____, _____ at about
(direction) (city) (country or area)

_____ local time today.
(hour) AM PM

1. The accident involved conventional high explosives and various radioactive materials, and US Forces Korea guards were with the material.

2. There were no casualties among the military personnel; (or) names of casualties are being withheld pending notification of next of kin.

3. The accident has possibly released a small quantity of potentially hazardous radioactive material into the area immediately surrounding the scene of the accident. Accordingly, US forces have taken the following safety precautions:

a. Ordered a trained team of fully equipped radiation safety monitors to the accident scene to conduct a careful and exact survey of the intensity and extent of any radioactive contamination. The team is expected to arrive in a few hours.

b. Staked out and closed around the scene of the accident a circular area of 500 meters radius, which represents the maximum area military authorities feel could be contaminated by an accident like the one today.

c. Issued special respirator protective masks to workers who must enter the closed area to assist in cleanup operations.

d. Asked local authorities to close streets and alleyways running through and near the closed circular area, and detour vehicular traffic.

e. Evacuated (if true) all nonessential personnel from an area bounded roughly by _____, _____, _____
(streets) (roads) (route)

(or other landmarks)

f. Warned all nonessential persons to stay at least 500 meters from the scene of the accident until it can be definitely determined that closer approach may be made in complete safety.

4. US Forces are rushing a decontamination team, completely trained and equipped to the site to conduct decontamination operations. The team is expected to arrive with, or slightly later than, the team of radiation safety monitors and will take all steps necessary to restore the area to normal with the least possible delay. Authorities expect any potential hazard to be of limited duration.

위 험
(Eighth Army NAICP)

An accident involving a military weapon has rendered the following area unsafe for human habitation:
군사 무기가 관련된 사고로 말미암아 아래에 표시한 지역으로의 출입

이 당분간 안전치 못하게 되었습니다.

A team of military experts is removing all causes of danger and you will be informed when it is again safe to enter this area. There is no further danger of explosions or fire. Warn all other persons to stay clear of the area.
일단의 군사 전문가들이 모든 위험물을 제거하고 있습니다. 이 지대로의 출입이 안전해지면 여러분에게 통고해드리겠습니다. 앞으로 새로운 폭발이나 화재의 위험은 없습니다. 다른 사람에게도 이 지대에 들어가지 말라고 주의를 해주십시오.
